

Exposio

Why HDR Photos Work

What is Exposio HDR Photography?

- High-dynamic-range (HDR) imaging is the compositing and tone-mapping of images to extend the dynamic range beyond the native capability of the capturing device.
- In layman's terms...
 - Perfect lighting every time
 - True to life depth
 - Extraordinary detail
- Camera takes 9 of the same frame in different lighting.

Using the Exposio Camera System

- Reserve the camera by calling DeDe or Hayley at least 48-72 hours in advance – first come, first serve.
- Checkout only on business days during business hours, unless there are extenuating circumstances.
- Come in 15-20 minutes prior to first checkout for a quick training session.
- Photos are loaded to your personal online account.
- Take as many pictures as you want, and only pay for the ones you choose.
- \$1.50/photo means you can fill MLS for \$54
