

## LOCAL PHOTOGRAPHERS

We have compiled a short list of just a few of the experienced, reputable, and talented photographers in the Wichita area. All of the following companies have taken headshots for our agents in the past with great results.

**Your headshot is one of the most important pieces of marketing you will ever buy.** Most agents use them for years, so when you look at the cost, think of it as a two- to three-year investment. For example, if you pay \$100 for a headshot and use it for three years, that equals an average cost of \$2.75/month. You spend more than that for coffee on your way to a single showing.

**All headshots should be taken on a bright, white background.** This will give you maximum utility for your photo as we can more easily remove or change the color of the background using photo editing software, as needed.

**Attention anyone with long or curly hair:** be aware that if you can see through your hair, it becomes near impossible to remove the background with a natural look. See photos below:

**Please make sure to get your headshot taken as soon as possible.** Once you have your headshot we can order your business cards and announce you as a BHGRE Alliance REALTOR® in local publications.

## Make sure to mention BHGRE Alliance when you schedule your session!
